StackDeal: Official 10-Section Pitch Document

India's Curated B2B SaaS 5-Year Deal Marketplace

Applicant & Startup Metadata

- Startup Name: StackDeal (<https://www.stackdeal.in>)
- Founder: Ujjawal Tiwari (Solo Founder & Full-Stack Developer)
- Current Stage: Live Public Beta / Working MVP (Launched September 2026)
- Program: First Capital by Indra Dhar (₹1,00,000 Non-Equity Investment & Mentorship)
- Core Offering: Curated 5-Year Access Passes for Indian Digital Agencies with 18% GST Invoicing and 70% Founder Rev-Share.

Document Purpose & Structure

This official document strictly fulfills all 10 evaluation criteria specified in the First Capital Participation Guide:

1. Your Startup | 2. The Problem | 3. Your Solution | 4. Your Product / Service
5. Market Opportunity (TAM-SAM-SOM) | 6. Business Model | 7. Revenue Strategy
8. Competitive Advantage | 9. Your Team & Execution | 10. Future Vision & Capital Deployment.

Current Operational Milestones (Live Proof)

- Production Platform: 100% active at <https://stackdeal.in> with Next.js 16 SSR & Groq AI Matchmaker.
- Product Hunt Debut: Debuted September 2026 with verified Maker profile and positive community engagement.
- Verified Google Indexing: 100% indexed on Google Search Console with green-tick verified status.
- Payment Architecture: Razorpay checkout integration with automated 18% GST B2B invoice generation.

SECTION 1 OF 10

1. Your Startup

What does your startup do? Who is it for? What are you building, and why is it relevant?

Core Identity & Mission

StackDeal (stackdeal.in) is India's curated B2B SaaS deal marketplace. We help Indian digital marketing agencies, growth teams, and freelancers eliminate recurring monthly subscription fatigue by offering transparent 5-Year Access Passes to essential business software.

Instead of paying expensive foreign currency subscriptions (\$30–\$99/month) with zero tax compliance, Indian buyers pay once in INR via native UPI/Cards and receive official 18% GST tax invoices for CA write-offs. Simultaneously, we provide bootstrapped SaaS founders with instant, zero-CAC distribution and 70% revenue share with bi-weekly payouts.

SECTION 2 OF 10

2. The Problem

What real problem, need, or market gap are you solving? Who faces this problem, and why does it matter?

A. The Indian Agency Struggle (Buyers)

- Severe Subscription Bleed: An average boutique digital agency uses 6 to 8 tools (WhatsApp bots, SEO trackers, scrapers, CRM), paying ₹20,000– ₹50,000 every month on credit cards, even during slow client seasons.
- 18% GST Tax Loss: Foreign billing from Stripe/US entities offers zero Indian GST compliance, causing Indian agencies to lose 18% input tax credit (ITC) on all software expenses.
- Payment Rejections: Under RBI e-mandate rules, most Indian debit cards face automatic foreign transaction declines on US websites.

B. The SaaS Founder Struggle (Sellers)

- Zero Marketing Distribution: Solo developers build solid technical software but lack the marketing budget to acquire their first 100 paying customers.
- Predatory Legacy Platforms: Global deal sites like AppSumo take 70% to 80% commissions and hold payouts for 60+ days.
- Infinite Lifetime Liability: Traditional "Lifetime Deals" burden founders with infinite server costs without clear boundaries.

SECTION 3 OF 10

3. Your Solution

How does your product or service solve the problem? What value does it provide to customers?

The 5-Year Access Pass Innovation

- For Agencies: Pay once in INR, get 5 full years of verified software access with zero recurring monthly bills, native UPI checkout, and automated 18% GST tax invoices.
- For SaaS Creators: Keep 70% of every sale with bi-weekly direct bank settlements, 100+ active agency power users, and a 1-Click AI listing copilot.
- Why 5-Year Passes Beat Lifetime Deals: 5-Year Passes establish healthy server boundaries while giving buyers multi-year cost certainty. Heavy agencies naturally expand into recurring plans as their client operations grow.

SECTION 4 OF 10

4. Your Product / Service

Show us what you're offering and how it works. (Live Production Platform: stackdeal.in)

Live Production Architecture (100% Deployed)

1. Next.js 16 SSR Engine: Pre-rendered server-side architecture delivering sub-second page loads, zero Soft 404 crawl errors, and Schema.org rich snippets.
 2. Razorpay & GST Engine: Native PhonePe, GPay, Paytm, and Card checkout with automated B2B PDF tax invoice generation.
 3. Groq AI Matchmaker: Llama-3 powered intelligent assistant that analyzes agency niche to suggest high-ROI software bundles in 3 seconds.
 4. Vendor Operations Vault: Secure admin portal for deal approvals, redemption code management, and payout tracking.
- Active Live Deals: Chat Chacha (WhatsApp AI Automation), SEO Rocket (AI Rank Radar), EmailExtractor Pro AI (B2B Lead Scraper), Nuwatomic (GEO AI SEO).

SECTION 5 OF 10

5. Market Opportunity

Who are your target customers? How large is the market? (SaaSBoomi, NASSCOM & IAMAI Data)

TAM • SAM • SOM Market Sizing

- TAM (Total Addressable Market): ₹1,20,000 Crore (\$14.5 Billion) — Total Indian domestic B2B SaaS software consumption market by 2026, growing at 28% annual CAGR toward \$50B by 2030 (SaaSBoomi Report).
- SAM (Serviceable Market): ₹8,500 Crore (\$1.0 Billion) — Annual software expenditure by 35,000+ Indian digital marketing agencies (spending ₹2.5L– ₹4.0L/year) and 1.5 Crore+ tech freelancers & solopreneurs.
- SOM (Our 3-Year Target): ₹85 Crore (\$10.0 Million GMV) — Target of acquiring 5,000 active digital agencies (representing only 14% of India's agency market) purchasing an average of 3.5 deal passes annually on StackDeal.
 Ø=ÜI StackDeal Net Commission (30% of ₹85 Cr): ₹25.50 Crore (\$3.0 Million) pure net revenue with zero inventory risk!

SECTION 6 OF 10

6. Business Model

How does your business create, deliver, and capture value? (Commercial Mechanics & Unit Economics)

High-Margin Marketplace Unit Economics

- Primary Take-Rate (30% Commission): StackDeal retains 30% of every 5-Year Pass transaction; 70% is transferred directly to the software creator.
- Unit Economics Example:
 - Average 5-Year Pass Retail Price: ₹12,499 (Buyer pays once for 5 years)
 - Founder Payout (70%): ₹1,749 (Direct bi-weekly bank transfer)
 - StackDeal Gross Profit (30%): ₹1750 per sale
 - Inventory Cost: ₹10 (Pure digital software fulfillment via automated license keys)
- Fulfillment Flow: Curate tool → Generate digital promo codes → Indian UPI checkout → Instant code delivery + 18% GST invoice → Bi-weekly founder settlement.

SECTION 7 OF 10

7. Revenue Strategy

How does your startup make money today — or plan to make money in the future?

3-Tiered Monetization Roadmap

1. Deal Sales Take-Rate (Live Today): 30% commission on all marketplace deal transactions.
2. StackDeal Plus VIP Membership (Q4 Launch): ₹2,999/year subscription for active agencies providing an extra 10% discount on all deals and 24-hour early access drops (100% recurring SaaS revenue).
3. Sponsored Vendor Spotlights: Featured hero carousel slots and dedicated agency newsletter blasts (₹25,000– ₹50,000 per launch campaign).

SECTION 8 OF 10

8. Competitive Advantage

Who are your competitors or alternatives? What makes your startup different?

StackDeal vs. Global Incumbents (AppSumo / PitchGround)

- Payment Rails: AppSumo requires USD credit cards with expensive foreign exchange markups. StackDeal supports native UPI, PhonePe, Paytm, RuPay, and Net Banking.
- GST Compliance: AppSumo provides foreign US receipts with 0% Indian GST credit. StackDeal delivers automated 18% GST B2B tax invoices with GSTIN validation.
- Founder Rev-Share: AppSumo takes 70%–80% cuts (founders get 20-30%). StackDeal gives 70% directly back to the creator.
- Model Sustainability: Legacy platforms push infinite lifetime deals; StackDeal pioneers the sustainable 5-Year Pass model.
- Niche Focus: AppSumo ignores Indian tools; StackDeal focuses on high-demand WhatsApp bots, scrapers, and local SEO tools.

SECTION 9 OF 10

9. Your Team

Who is behind the startup? Introduce the founders, their roles, and execution experience.

Founder Profile & Execution Capability

- Ujjawal Tiwari — Solo Founder & Full-Stack Builder
- Technical Mastery: Engineered the complete StackDeal production platform from scratch (Next.js 16, TypeScript, MongoDB, Razorpay API, Groq AI).
- Speed & Problem Solving: Solved technical SEO SSR soft 404 indexing challenges, debuted on Product Hunt, and deployed a production marketplace with zero external capital burn.
- Execution Principles: Hyper-lean capital discipline, daily shipping cadence, and organic community-driven customer acquisition.

SECTION 10 OF 10

10. Future Vision & Capital Deployment

Where are you taking this business? Share your growth plans and how you will deploy First Capital (₹1 Lakh).

Deployment of First Capital (₹1,00,000 Non-Equity Grant)

- 40% (₹40,000) — Vendor Curation & Onboarding: Direct outreach and launch onboarding incentives to secure exclusive 5-Year Passes for the first 25 verified high-utility SaaS tools.
- 35% (₹35,000) — Agency Community Distribution: Targeted spotlight campaigns across Indian marketing agency WhatsApp hubs, LinkedIn founder networks, and digital marketing communities.
- 25% (₹25,000) — Platform Infrastructure & Scaling: Dedicated production server capacity, automated GST invoice pipelines, and Groq AI Matchmaker scaling.

12-Month Hard Performance Milestones

- Curate 50+ Verified SaaS Tools across WhatsApp, AI SEO, Lead Scrapers, CRM, and Productivity.
- Onboard 2,000+ Active Paying Agency Accounts across Tier-1 and Tier-2 Indian business hubs.
- Generate ₹1.5 Crore+ in Deal Sales GMV with strong positive operational cash flows.
- Direct Economic Impact: Enabling 50+ Indian bootstrapped software creators to earn their first ₹5L to ₹10L in sustainable revenue.
